How to prepare the Bulk Payment file for Vendor Payments

- 1. Refer to the attachment /format named Generic map format and sample .zip in the e-invite. This zip folder contains two excel files
 - a. HSBC_India_Payment_Template-FreeText Advising.xls- (This is the file format to fill the details)
 - b. Sample-FreeText Advising.csv (This is the sample format)

Please open the first file

- **1.** You need to fill the file named **HSBC_India_Payment_Template-FreeText Advising.xls** by referring to the specification mentioned below or the comments captured in the header of the file, which provides information on mandatory and non mandatory fields. This specification file also contains dos and don'ts that are important to be referred to.
- 2. Fill all the mandatory column in template file as per specification given below Notes: - All numerical fields to be converted into text to avoid the preceding zeroes to be deleted when converted to csv file format.

The naming convention of the file can be created with any name.

Note: Once the file is converted into CSV format, Please do not open the file into excel format. If you to check want to double check the data value from file. Please do open the file into "Notepad" format.

2. After the file is saved into CSV format , please refer below steps to upload the file on HSBCnet

Steps to upload the Bulkpay/Salary /Reimbursement file on HSBCnet

- 1. Log into HSBCnet Portal
- 2. Go to Menu Select Payments & Transfers ----- File Upload
- 3. After clicking on File Upload, a new page will open ,in that page you need select the option called Customer Payments
- 4. After clicking on Custom Payments, go to file format and select IN PP Map. XLIN07MI
- 5. Click on ATTACH file and browse the file that you saved and prepared earlier in the above steps.
- 6. Once the file upload is completed , select Instruction Level Authorization (IIA)

What is Instruction Level Authorization:- allows you to upload a file of instructions where each item must be authorized separately by another user . This is authorization type is used to authorize payments where if required they can reject the transaction as required.

7. After which click on the AUTHENTICATE TAB at the end of the page.

Note: once the file is converted into CSV format, Please do not open the Into excel format. If you want to double check the data value from file please do open the file into "Notepad" format.
